Utiltyx Announces New Advisory Board Member: Bryan J. Olnick

Utiltyx is pleased to announce the addition of Bryan J. Olnick to their Advisory Board. Throughout the electric utility industry, he is a well-known and respected electric utility operations strategist and innovator while also having unique experience as a tactical planner and change-maker known for delivering results. Bryan retired in 2020 as Vice President of Electric Distribution Operations at Florida Power & Light Company. During his 36 years at FPL, he served in various key leadership roles helping to drive industry and business strategies in Smart Grid Innovation, Distributed Energy Resources, Data Analytics, Grid Resiliency, Storm and Disaster Emergency Response, Storm Hardening, and Distribution Systems and Control Center Operations resulting in record setting reliability, cost, and customer service performance. Bryan is a recognized expert in Smart Grid technologies and as the President and Founder of GridSky Strategies he continues to provide executive level advisory services covering all aspects of electric utility operations.

Konda Ankireddyapalli, Founder & CEO of Utiltyx, commented, ***“We are thrilled to welcome Bryan to our Advisory Board. He has a rich background and brings a wealth of knowledge and experience in the electric utility sector will be invaluable as we strive to transform how security is addressed, network models are updated and visualized, and Grid data is leveraged in power distribution. We are confident that Bryan’s strategic insights and innovative thinking will bring a unique voice to our team to propel Utiltyx forward in our endeavors.”***

Bryan’s professional affiliations have extended across a wide array of organizations, including the Institute of Electrical and Electronics Engineers, Association of Edison Illuminating Companies, Florida Engineering Society, Edison Electric Institute, Southeast Electric Exchange, Veterans In Energy, and was a member of the US Dept. Of Energy’s Electricity Advisory Committee. He is also an experienced and active Advisory Board member in the Energy Industry providing his expertise and insights to drive innovation and success.

VISIBILITY. SECURITY. ANALYTICS.
